Steve Jacobson of Jacobson Transfer
5. Diane Loeffler remembrance – Paula Allan
6. Quincy Hall – Facilitated by Robert Thompson
-Pauline, Kam, Keyvan Provided an introduction to the Quincy Hall project.

A handout was provided with a description of the event center. Types of events were described as corporate meeting on weekdays. Weddings and galas are typically scheduled on the weekend. Examples of the types of foods catered was provided in the handout. Parking and traffic management plan will be facilitated by security.

Questions:

Will there be other security?

-Require clients to have security with liquor. Won't have underage concerts. Cater to a clientele who can afford a higher end event.

Why did you pull your application for a 2AM?

-Heard from the community that 2AM is too late. Wished to pull back until we could have a conversation with the neighborhood.

12 to 1AM is very important to the business model. The event center competition is open to 1 or 2AM. Event programs require later hours.

Highlights parking lot is leased until 11:59PM?

Recognize there needs to be a parking solution until 1AM. Will not do events until we solve the parking event.

My experience is the noise of a location like Muse. How can you control noise and traffic.

-Learned from events when we took over Muse that had much noise. There will be no concerts at this event center.

Who controls the sound level?

-We control it. Utilize a limiter to control a cap on the volume. The type of events we do not come with sound issues. They are celebratory and fund raisers.

Clarification of numbers. Website says they cater to 1000 ads.

-Probably Star Tribune which should have been changed. Thought it could be 1000 but the space only allows for 800.

What will happen with corporate breakfasts?

Need to have people bused in or corporate busing to bring people in when there isn't.

Additional notes taken by Robert Thompson provided to board so that these can be summarized and shared with city council.
